

**U.S. Department of Agriculture, Forest Service
Employment Outreach Notice**

**Temporary Forestry Technician (Research)
Field Crew Member
GS-0462-05/06**

Pacific Northwest Research Station
Resource Monitoring and Assessment Program
Forest Inventory and Analysis

Please reply by January 5, 2018

The PNW Research Station, Portland Forestry Sciences Lab, *may* hire 1 - 10 *temporary* positions as field data collection crew members with the Forest Inventory and Analysis (FIA) program. Positions may be located in Washington, Oregon or California and will be filled based on changes in current workforce. Salary is dependent on location and grade.

2018 Satellite Duty Locations:

| | | | | | |
|----------------|----|-------------|----|---------------|----|
| San Bernardino | CA | Mt Shasta | CA | Olympia | WA |
| Fresno | CA | Grants Pass | OR | Sedro-Woolley | WA |
| Mammoth Lakes | CA | Eugene | OR | Twisp | WA |
| Nevada City | CA | Portland | OR | Cle Elum | WA |
| Chico | CA | Bend | OR | | |
| Redding | CA | La Grande | OR | | |

PLEASE NOTE: The purpose of this Outreach Notice is to determine the potential applicant pool for this position. The vacancy announcement for this position, when open, will be posted at the USA Jobs website, the U.S. Government's official site for jobs and employment information: <http://www.usajobs.opm.gov>

About the position:

These are temporary positions (not to exceed 1039 hours) and the duration of work is expected to be 3-6 months in length. Targeted start date is April 1st for all new hires in order to participate in training activities. The positions are likely to run into September or October.

The positions are with the Data Collection Team of the PNW Research Station's Resource Monitoring and Assessment (RMA) Program, Forest Inventory and Analysis (FIA) unit. The FIA unit is part of a nationwide program which collects, processes, analyzes, evaluates, and publishes comprehensive information on forest and other related renewable resources. Administration for this Data Collection team is located in Portland, Oregon and field crews are remotely stationed throughout Washington, Oregon and California.

These positions will support work sampling field plots located on a systematic grid across all landownerships and will be almost entirely field based. A wide variety of information is collected in the inventory including: tree measurements; forest pathogens, understory vegetation composition and structure, stand treatments and disturbances, down woody material measurements, and land ownership.

Crew members work under the direction of a local crew leader and work alongside one to three people. Crews will use maps, aerial photos, and GPS units to navigate to permanent plot locations. Measurements taken by crews include: tree/sapling/seedling data (species, diameter, height, defect, insect & disease, damage, etc.); understory vegetation (shrub, herb, grass species and percent cover, etc.); down woody material (line transects, litter depth, and fuels measurement, etc.); and site index and site attributes (site tree selection, slope,

aspect, topographic position, distance to water, etc.). Crews use portable, handheld computers to collect data in the field and then process the data later using laptop computers to address any inconsistencies or errors.

Each crew travels frequently and independently within their duty station area. Crews can expect to travel away from home for a significant portion of the field season (40-70% dependent on duty location). Travel will sometimes involve week-long trips while other times crews may need to spend a month away from home. During travel periods, crews will change locations about weekly. Lodging is generally in motel/hotels and car camping, with occasional backpacking required.

In all areas work conditions are arduous, requiring regular and recurring physical exertion. In many locations, work days frequently exceed 10 hours. Work may be performed in inclement weather (cold, heat, rain, snow) and on rugged, steep, slippery, and/or brushy slopes. Significant amounts of on-trail and off-trail hiking are required. Crewmembers must carry a 45lb pack daily, with pack weights sometimes exceeding 60lbs. Exposure to hazards such as poison oak, bears, and insects is common. Additionally, travel by helicopter, stock animal, or boat is occasionally required.

****Government Housing will NOT be available****

Please see qualifications at: <http://www.opm.gov/qualifications/>
