

The Nature Conservancy
Dublin, Ohio Field Office

Position Title: Restoration Ecologist

Full-time

Position Description:

The Nature Conservancy's Ohio Stream and Wetland In-Lieu Fee Mitigation Program (OMP) utilizes mitigation funds to locate and develop restoration projects in the state of Ohio that maximize success and conservation outcomes for the State's dynamic watersheds. The Restoration Ecologist manages the planning and implementation of multiple restoration projects across the state of Ohio.

Duties:

The position's primary responsibilities are managing OMP restoration projects, including, but not limited to: developing and managing project budgets; reviewing and implementing comprehensive mitigation plans; performing wetland delineations and other ecological assessments, developing scopes of work, requests for proposals, and contracts for mitigation activities; coordinating with and providing oversight of contractors; overseeing success monitoring; securing release of compensatory mitigation credits; implementing corrective actions and engaging project partners. This position is responsible for understanding and implementing OMP operations and objectives. Supervises and/or coordinates the work of others and provides technical support to TNC staff in assessing potential mitigation sites that are appropriate as OMP projects. The Restoration Ecologist works under the supervision of the Mitigation Program Manager, and collaboratively with other OMP staff, TNC conservation staff, staff from the Corps, Ohio EPA and other organizations, and individuals as needed in carrying out duties.
