

VISITING LECTURER – VERTEBRATE ZOOLOGY
EASTERN WASHINGTON UNIVERSITY
One-year appointment

The Department of Biology at Eastern Washington University (EWU) invites applications for a one year visiting lecturer position with expertise in **Vertebrate Zoology** to begin in September 2022.

The Department of Biology has 19 tenure-track faculty and approximately 400 undergraduate majors and 25 MS students. The successful applicant will have the opportunity to mentor undergraduate students working on independent research projects and is also encouraged to interact with graduate students. Although this is a one-year appointment, we encourage applicants to identify potential collaborations with existing faculty members to allow access to research facilities and continued research productivity.

Teaching responsibilities include 45 credits per academic year, subject to departmental needs. Courses may include BIOL 304 (Vertebrate Zoology); BIOL 514 (Graduate-level seminar, Current Topics in Ecology and Evolution), BIOL 173 (General Biology III), BIOL 399/499 (Independent Study for students in the faculty member's research area), and an elective course in the applicant's area of expertise, such as mammalogy. Although all Biology sub-disciplines will be considered, preference will be given to candidates with a background including field-based research on terrestrial vertebrate biology and/or wildlife management and conservation.

Eastern Washington University is an affirmative action/equal opportunity employer, and applications from members of historically underrepresented groups are especially encouraged. SPECIAL ACCOMMODATIONS: Eastern strives to satisfy all requests for special access needs for persons with disabilities. Requests for such accommodations are welcome and may be made by calling Human Resources at: (509) 359-2381.

REQUIRED QUALIFICATIONS

- PhD in Biology or related field by the time of appointment
- Ability to teach a 300-level Vertebrate Zoology course
- Ability to teach an Introductory Biology course on plant and animal form and function
- Clearly articulated plan to engage undergraduates in independent research experiences
- Excellent communication skills to meet the needs of our diverse student body
- Demonstrated ability to apply a culturally responsive and flexible approach that is supportive to the diverse needs, including universal access, of our students, faculty, staff, and the public
