The Uinta Wasatch Cache National Forest

The Uinta-Wasatch-Cache is one of the thirteen National Forests in the Intermountain Region as well as one of the urban National Forests in the National Forest System. It covers an area that includes northern and north-central Utah, and southwestern Wyoming. This area also includes the largest population center within the State of Utah, which is known as the Wasatch Front. The Forest is heavily influenced and impacted from over a million people living in close proximity. The Uinta-Wasatch Cache National Forest has a net acreage of 2,169,596 acres. It is divided into seven Ranger Districts: Salt Lake, Kamas/Heber, Ogden, Pleasant Grove, Spanish Fork, Logan, and Evanston/Mountain View (in Wyoming). Scenic beauty on the Forest offers unlimited recreational opportunities throughout the year. Whether you enjoy skiing, snowboarding, snowmobiling, hiking, mountain biking, camping, picnicking, fishing, boating, swimming, horseback riding, etc., you can find the recreational experience you are seeking. Because of the abundance of recreation opportunities and the large urban population along the Wasatch Front, the Uinta-Wasatch Cache National Forest is one of the most heavily visited in the entire National Forest System. Northern Utah and southwestern Wyoming enjoy four distinct seasons. Temperatures range from an average low in the mid-teens in the winter to average highs in the summer in the low '90's. Annual precipitation averages approximately 16 inches.
