Course Description: The purpose of this course is to provide working professionals with an introduction to applied statistics and programming. To achieve this, we will use an open source (freely available) program called “R.” Upon completion of the course students will be able to manipulate data, analyze data with appropriate statistical tools, and interpret associated results. These quantitative skills underpin modern natural resource management and related fields, and will increase competitiveness for those seeking careers in these fields.

* 3 Graduate Credits
* Semester Based On-line Course
* Fulfills Quantitative Methods Requirement

Instructor: Mariya Shcheglovitova
