Summer Internship Program

Summer Internship Program - 2-3 Positions Available

Logan City Environmental Department seeks one to two students for a summer internship program. The students will work with Logan City Environmental Department on projects regarding Logan City’s recycling and energy programs.

The interns may enroll in a one-credit internship class during the fall semester after the summer internship period to produce a final project report if desired. A QCNR faculty member will grade this internship course.

- The successful candidates will be prepared to work with the public in a professional manner.
- 8 am - 5pm Monday through Friday (with an occasional Saturday)
- Must be able to adapt to a variety of roles and responsibilities (eg, data entry one day and working outside in the heat the next).
- This position is for approximately 30 hours per week

Selection of Interns

Students from the Quinney College of Natural Resource at Utah State University will be eligible for this internship. Application process will include evaluation by QCNR personnel, with input from City of Logan personnel, and be based on student’s progress towards a degree, a summary of student’s career goals, and a letter of recommendation from a USU faculty member. Application review will begin on March 16.

Intern Benefits

- $12/hour for 30 hours per week
- Interns will be responsible for their own transportation to and from the job site at 153 N 1400 W in Logan, UT.

Apply: Deadline is March 20
Please send a resume, cover letter and references to Emily Malik, emily.malik@loganutah.org.
