Utah Division of Wildlife Resources Northeastern Regional Sport Fish technician

03/06/2020

Utah Division of Wildlife Resources Northeastern Region Sport Fish Intern

(1 Position)

Description

We are seeking assistance in our Northeastern Regional Office’s Sport Fish Program. The intern will help collect and enter field data on fish in northeastern Utah lakes, reservoirs and streams.

Duties

The intern’s job duties will include:

- Red Fleet & Big Sand Wash Walleye blood sampling
- Pineview Black Crappie collection and transfer
- Pelican Lake fish sampling (monthly collections for multiple data points)
- Starvation Smallmouth Bass population estimation data collection
- Moon Lake zooplankton/water quality sampling
- Pole Creek Lake fish surveys
- Currant Creek Lake fish surveys
- Duchesne River Interagency Biological Assessment Team surveys
- Starvation forage surveys
- Data entry, aging of Yellow Perch from Big Sand Wash, other small projects where time allows

Qualifications

Applicants must be current undergraduate students in a degree program in the Quinney College of Natural Resources. Applicants must have a general knowledge of wildlife, aquatics, and/or habitat management in Utah. They must have the ability to learn new skills rapidly and effectively as well as take instruction and conduct field or office work as directed. They should also have the ability to operate office, laboratory, and field equipment, including vehicles, safely and effectively. A valid driver's license is required. Successful applicants will be expected to work under difficult field conditions for extended periods of time.

Salary: $11.49 - $12.24 depending on experience

Location: base of operations Vernal; no housing provided.

Number of Openings: 1

Closing Date: applications will be accepted until 11:59 pm 20 March 2020
